Dear Sirs

I am a canine massage therapist operating in the Wolverhampton area. I am contacting you because your client has expressed an interest in having a treatment with me.

The treatment involves the client's dog receiving up to three treatments with me over the course of three weeks. The initial treatment will involve a gait and postural Analysis, past medical history, daily lifestyle, diet, palpation and a one hour massage treatment.

I also offer some canine conditioning exercises to some clients as required. These are a set of exercises designed to develop fitness in dogs so could include strengthening, core strength, flexibility or proprioception exercises as relevant. These exercises have also been shown to be effective as part of a rehabilitation programme.

The subsequent two treatments will be approximately one hour long and upon completion of them, at your request, I can complete and send to you a report on my observations and findings.

Please note that **I will not be manipulating joints or the skeleton** as part of my work and will be concentrating purely on the application of safe, structured massage techniques that may help issues such as strains (Grade I & II), trigger points, spasms and myofascial issues by working on the muscular system.

In order to do this I request that you complete the attached Veterinary Consent Form which complies strictly with UK Legislation; specifically the Veterinary Surgery (Exemptions) Order 2015.

I am fully insured by the insurers Balen's. I am also a member of the Canine Massage Therapy Guild, the recognised professional body for canine therapeutic masseurs.

Thank you for your time. If you have any further queries you can contact me using the details at the top of this letter.

Yours faithfully

Sam Axtell
